

# MESH BASKET

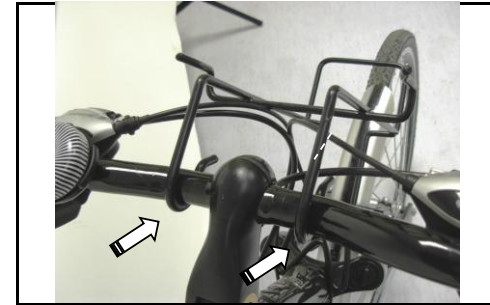

## INSTALLATION INSTRUCTION SHEET

Contents:  
Mesh  
Basket x 1

Support  
bracket x1

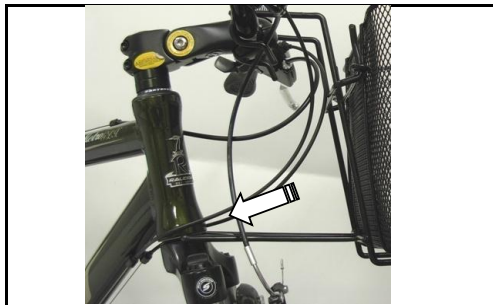

1. Place the basket bracket over the handlebar in a centered position.

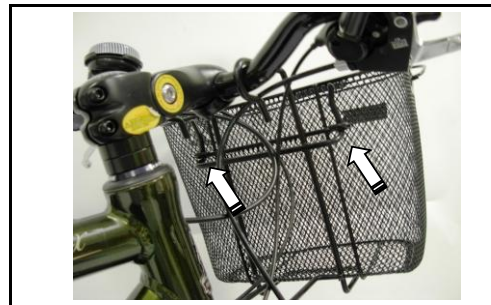

1a. The bracket should be placed on the handle bar without trapping any cables or obstructing the bike reflector or lights, if fitted.

No Tools Required

1b. Check that there are no trapped cables between the bottom the bracket and the frame.

2. Your bracket should now be firmly attached. Attach the basket by placing the basket support bar onto the bracket.

2a. Ensure the basket is resting on the base of the bracket and that the basket does not effect the steering of the bicycle

### CAUTION:

Not suitable for all types of bikes.

To avoid causing damage or wear to the bike frame or handlebar, ensure that the basket is secure at all times.

### WARNING:

Do not load more than 5kg into handlebar basket, as this can affect steering.

Ensure all brake and gear cables function correctly after fitting.

Check the basket does not affect the steering of the bicycle before riding, at all times.
